

# NEW PRODUCT ANNOUNCEMENT!

## COKIN INTRODUCES THE WORLD'S BEST FILTER ADAPTER EVO Aluminum Filter Adapters Are Here!

Cokin and OmegaBrandess are proud to introduce the latest in finely machined products for the photo enthusiast. The EVO Filter Adapters are crafted of aluminum providing impact-resistant strength and rigidity and a host of well thought out features. Available in L (Z) and M (P) sizes, the EVO Filter Adapters will look familiar as the core design heralds back to the original Z-Pro holders introduced by Cokin in 2005. Like the original, you will find the ability to hold up to 3 Cokin filters and each Adapter comes with a set of spacers that allows for customizing the configuration the way you want it. These spacers can accommodate filters up to 4mm thick. Sections are held together with durable brass screws and nuts which won't corrode over time.

But that's where the similarities end. First of all, this style of filter adapter was not available in the M (P) size from Cokin before. Then there is the fact that both versions of the EVO feature a threaded front flange that is ready to accept a screw in filter, typically a CPL, leaving the slots free to hold your favorite ND or Graduated filters or both! This thread is 95mm for the M size and 105mm for the L size.

# NEW PRODUCT ANNOUNCEMENT!

Speaking of using ND filters, it is critical to prevent any light from entering between the filter and the lens when working with 10-stop ND's such as the Nuances CMP1024 or CMZ1024. EVO solves that problem with the built-in gasket that softly hugs the rearmost mounted filter blocking any extraneous light from effecting the metering.

Mounting the EVO Filter Adapter to your lens is fast and easy. Required is a Cokin Adapter Ring (M or L series) in the thread size that matches your lenses. Once screwed into the lens, just slide the Evo Adapter onto the ring until it snaps into place. This makes it extremely convenient to move the EVO Filter Adapter from one lens to another. No separate step-down rings required. Although both the M and L adapters can mount on any existing M (P) or L (Z) series adapter ring, Cokin recommends that they not be used on lenses with filter sizes larger than 62mm or 95mm respectively, in order to minimize the risk of vignetting the image. This is

PRODUCT SCHEDULED TO BEGIN SHIPPING IN MAY 2017
