KODAK PROFESSIONAL TRI-X 320 / 400 Film

KODAK PROFESSIONAL TRI-X 320 and 400 Films are high-speed panchromatic films that are a good choice for photographing dimly lighted subjects or fast action, for photographing subjects that require good depth of field and fast shutter speeds, and for extending the distance range for flash pictures. TRI-X 320 Films (320TXP) feature excellent tone gradation and brilliant highlights. Both are especially well suited to low-flare interior lighting or flash illumination. They are also useful for portraiture with low-contrast backlighting outdoors. You can retouch these films on the emulsion or base side.

KODAK PROFESSIONAL UV-Curable Display Film Plus

UV-Curable Inkjet Film for photo-quality, high-impact display images. KODAK PROFESSIONAL UV-Curable Display Film Plus enables the creation of cost-effective, high-impact displays. This fast and low-cost alternative to traditional display materials is ideal for point-of-sale and advertising, especially in high-traffic applications. This improved version of the existing display film product, allows significantly better ink adhesion. Similar to KODAK PROFESSIONAL ENDURA Transparency Display Material, this media features exceptional clarity, consistency, and quality. The technology behind new UV-Curable products improves productivity while upholding the impact of the message. A translucent based color transparency material for use on illuminators without built-in diffusers.

KODAK PROFESSIONAL ENDURA Premier Paper (Non-Back Print)

Award-winning KODAK PROFESSIONAL ENDURA Papers set the gold standard for print quality. KODAK PROFESSIONAL ENDURA Premier Paper is designed to raise the limits for color negative paper even further with more vibrant colors. ENDURA Premier Paper features a technological breakthrough, the latest advancement in coupler technology, which expands your capability to create high-quality, professional, compelling prints. Now, due to Kodak's innovative cyan dispersion and emulsion technology, you can benefit from an even larger color gamut, all the while maintaining clean whites, rich blacks, and realistic skin tones. This paper will produce more colors than were possible with previous ENDURA Papers.

| KODAK ROYAL Digital Paper | | | | | | |
| An exceptional, color negative paper for making color prints from color negatives. It delivers bold, saturated colors, superior print longevity, and works well in optical and digital imaging systems. Building on previous generations, it delivers improved rich sharp text and image reproduction in digital printers for sharper, brighter pictures and skin tones that enhance flesh tone reproduction for consistent, natural looking skin tones. Finished roll sizes maximize printer magazine capacity to provide increased productivity and less paper waste. Easily identified by its thicker support, which provides durability in handling, and by its distinctive gold KODAK ROYAL Paper watermark. | | | | | | |

Color Negative Film Bleach

KODAK FLEXICOLOR Bleach Starter

Use this starter to prepare a bleach working solution from FLEXICOLOR Bleach III Replenisher. This product is odorless, non-corrosive, and non-foaming for ease of use. See instructions on bottle for how to use.

KODAK FLEXICOLOR Bleach Starter / Case of Four / 1.2 L bottles / Concentrate
6601082 4

KODAK FLEXICOLOR Bleach III Replenisher

You can use this bleach as a replenisher or mix it with starter to make a working solution. The bleach overflow can also be regenerated to reduce the chemical costs and minimize the chemical discharge. Each case contains 2 10-L of each Part A and Part B. Ordering two cases will yield 40 L.

KODAK FLEXICOLOR Bleach III Replenisher / Packaged 2 Part A and 2 Part B per case to yield 20 L
6600258 2

KODAK FLEXICOLOR Bleach III Regenerator

Use this chemical if you regenerate and reuse the overflow from your FLEXICOLOR BLEACH III tank solution.

KODAK FLEXICOLOR Bleach III Regenerator / To regenerate 100 L **3626850** 1

KODAK FLEXICOLOR RA Bleach Replenisher NR / C-41RA

This bleach is designed for use ONLY for Process C-41RA in minilabs. This bleach cannot be regenerated.

KODAK FLEXICOLOR RA Bleach Replenisher NR / C-41RA / To make 5 L
8255549 2

KODAK FLEXICOLOR AR Bleach Replenishers

(Use 2 cases of KODAK FLEXICOLOR Bleach III Replenisher to make 40 L, Item No. 6600258)

KODAK EKTACOLOR RA Chemicals for Process RA-4

KODAK EKTACOLOR Chemicals are supplied as all liquid concentrates for easy mixing and handling, and in these sizes for the most economical and efficient use in your laboratory.

One each of the following chemicals from the groups indicated is needed to process KODAK PROFESSIONAL ENDURA Premier Papers; KODAK Edge Papers; and KODAK PROFESSIONAL Display Materials:

- Color Negative Paper Developer Replenisher • Color Negative Paper Bleach-Fix Replenisher • Color Negative Paper Stabilizer and Replenishers (only minilabs that don't use wash water)

Color Negative Paper Developer Replenisher

KODAK EKTACOLOR RA Developer Replenisher

Use this solution to replenish developer tank solution. It can also be used to make a tank solution by adding KODAK EKTACOLOR RA Starter and water according to the instructions packed with the chemicals. Developer temperature is 95° F.

| | | |

| KODAK EKTACOLOR RA Developer Replenisher RT / To make 25 gal | 8477184 | 1 |

KODAK EKTACOLOR Digital Developer Replenisher RT

Improved formulation will significantly reduce the potential for crystals to form when concentrates are stored or transported at low temperatures. This developer is designed primarily for digitally exposed output to produce extra-high D-Max with KODAK PROFESSIONAL ENDURA media, especially ENDURA Transparency and Clear Display Materials, processed through roller-transport (RT) processors.

Color Negative Paper Developer Replenisher-continued

KODAK EKTACOLOR RA Developer Additive

Add to KODAK EKTACOLOR RA Developer Replenisher RT if the processor utilization is very low and additional protection from oxidation is needed. Use this additive only with EKTACOLOR RA Developer Replenisher RT, NOT EKTACOLOR RA Developer Replenisher or EKTACOLOR Digital Developer Replenisher RT. Do NOT add this additive directly to the developer tank solution. A replenisher treated with this additive requires a different replenishment rate. (See KODAK Publication Z-130D included in the Z-130 manual, 'Using KODAK EKTACOLOR Chemicals'.)

KODAK EKTACOLOR RA Developer Additive / Case of Four / 1.2 L bottles / Concentrate
5288600 4

KODAK EKTACOLOR RA Developer Starter

Use this starter to prepare a developer working solution for all KODAK EKTACOLOR Developers including EKTACOLOR PRIME SP Developer Replenisher LORR / RA-4, EKTACOLOR RA Developer Replenisher, EKTACOLOR RA Developer Replenisher 12, and EKTACOLOR RA Developer Replenisher RT.

Miscellaneous Color Negative Paper Chemicals

KODAK EKTACOLOR Processing Cartridge 92/110

The Processing Cartridge 92/110 features a 23 percent increase in processing capacity for use with professional papers such as Kodak ENDURA papers. Replenishment rates are reduced and each EKTACOLOR Processing Cartridge 92/110 will now process 92 square meters of paper versus 75 square meters with the Processing Cartridge 75. This results in fewer cartridge changes, reduced order frequency and lower inventory. For use with consumer papers such as KODAK EDGE and ROYAL Digital Color Papers on Agfa Diab2 printers, the EKTACOLOR Processing Cartridge 92/110 is a drop-in solution that will process 110 square meters of paper with no change required to replenishment rates.

KODAK EKTACOLOR Processing Cartridge 92/110 / To process 92/110 sq meters of media
1145465 2

KODAK EKTACOLOR Processing Cartridge 111 / RA-4

A multi-chambered KODAK EKTACOLOR Processing Cartridge 111 design that can be used on all Fuji Frontier models including the 500 series models. The EKTACOLOR Processing Cartridge 111 remains a unique solution when used with Kodak Edge or Royal Digital papers, in that the same processing cartridge can be used with either of Fuji's CP49E or CP48S process cycles. For customers with both 300 series and 500 series Frontier models, only one cartridge chemical product needs to be ordered and inventoried. The cartridge is a 'Drop-In Solution'. No changes or modifications to the equipment or, existing chemistry, are necessary. This features a one-piece molded multi-chambered container. Consequently, no corrugated container is required to hold three individual bottles in place. With no corrugated material, the exhausted cartridge disposal waste is reduced and easier to recycle.

KODAK EKTACOLOR Processing Cartridge 111 / RA-4 / To process 111 sq m of media / 7170 4 x 6-in prints
8387375 2

KODAK EKTACOLOR PC 111 Rinse Tablets

For use on all models of the FUJI Frontier Digital Minilab paper and film processors. It is a drop-in product requiring NO changes or modification to the equipment or existing chemistry. Just place the tablet in the slot on the machine and mix with water.

KODAK EKTACOLOR PCIII Rinse Tablets / Bottle of 100 tablets / Each tablet to make 5 L

KODAK EKTACOLOR SM Chemicals for SM Minilabs for Process RA-2SM

KODAK EKTACOLOR SM Processing Unit P1, Version 2.2

Kodak has made some exciting changes and improvements to the KODAK EKTACOLOR SM Processing Unit P1 that will benefit our valued customers' operations. Some of these features include: Processing capacity doubled from 10,000 4 x 6 prints to 20,000 prints; Developer concentrate changed from three parts to one part; Increased reliability for equipment concentrate delivery; No need to adjust pump rates or replenishment rates; and inner packaging features one piece design with two chambers, assuring complete emptying of concentrates.

Control Strips

KODAK Control Strips, Process C-41

Sensitometrically exposed film strips to monitor the processing of color negative films in KODAK FLEXICOLOR Chemicals. A Rochester processed reference strip on the same emulsion is included with each package for comparison purposes.

KODAK Control Strips, Process C-41 / 35 mm x 100 ft roll **1803709** 1

KODAK Control Strips, Process RA-4

Sensitometrically exposed paper strips for monitoring the processing of KODAK EDGE and ROYAL Papers using KODAK EKTACOLOR RA Chemicals, Process RA-4 and RA-4NP. A processed reference strip of the same emulsion as the control strips is included with each package for comparison. Strips must be stored at 0°F (-18°C) prior to usage.

KODAK Control Strips, Process RA-4 / Box of 25 strips / 3.5 x 12 in **8982746** 1

Each carton contains 5 moisture-proof envelopes with five 3.5 x 12 inch strips each.

KODAK PROFESSIONAL Pro Strips Color Negative Paper Control Strips

Control strips optimized for KODAK Professional ENDURA Paper and Display Materials. This control tool helps labs to precisely track the quality of their professional RA-4 paper process. They provide the most accurate representation of how KODAK Professional products are performing in the RA-4 chemical process because they are coated with ENDURA emulsion.
